## ABOUT ME

I received training in the frontend field through a course I took from Udemy during my university years. With what I learned from the course, I started working at Gülenayva when I was 19 years old and worked for 2 years. During my time working, I learned ReactJS, Angular(TypeScript), Svelte and Qwik and took part in many large/small scale projects (Honda, Vitra, LCW etc.). My goal is not to stop until I reach a good level in this field.
